Generating a new SSH key

↪ Generating a key

Here's an example command that will generate an Ed25519 key and save it as `~/.ssh/id_ed25519`

SHELL

```shell
$ ssh-keygen -t ed25519 -f ~/.ssh/id_ed25519
```

You will be prompted to add a passphrase to secure your key.

After you've generated your key, the next step will be to <u>add the key to your account</u>.
